RSVP to confirm your attendance.

**(360) 695-2823**

**You are Unique!** Some people, because of their genetic makeup, aren't able to break down medications in an effective manner. Conversely, some people break down these medications too efficiently — before they have an opportunity to work as prescribed. Through a painless cheek swab, a report on a persons' unique genetic makeup can help prescribe...

**The RIGHT medication . . .  
at the RIGHT dosage . . .  
specifically selected for YOU!**

NAMI SW Washington has partnered with Advanced Medical to provide an evening workshop to educate you on the testing of genetic biomarkers that can help you make more informed medication decisions. An overview of the science, the technology and how insurance companies are responding will be provided.
